## HIGHLIGHTS FOR JULY 2012

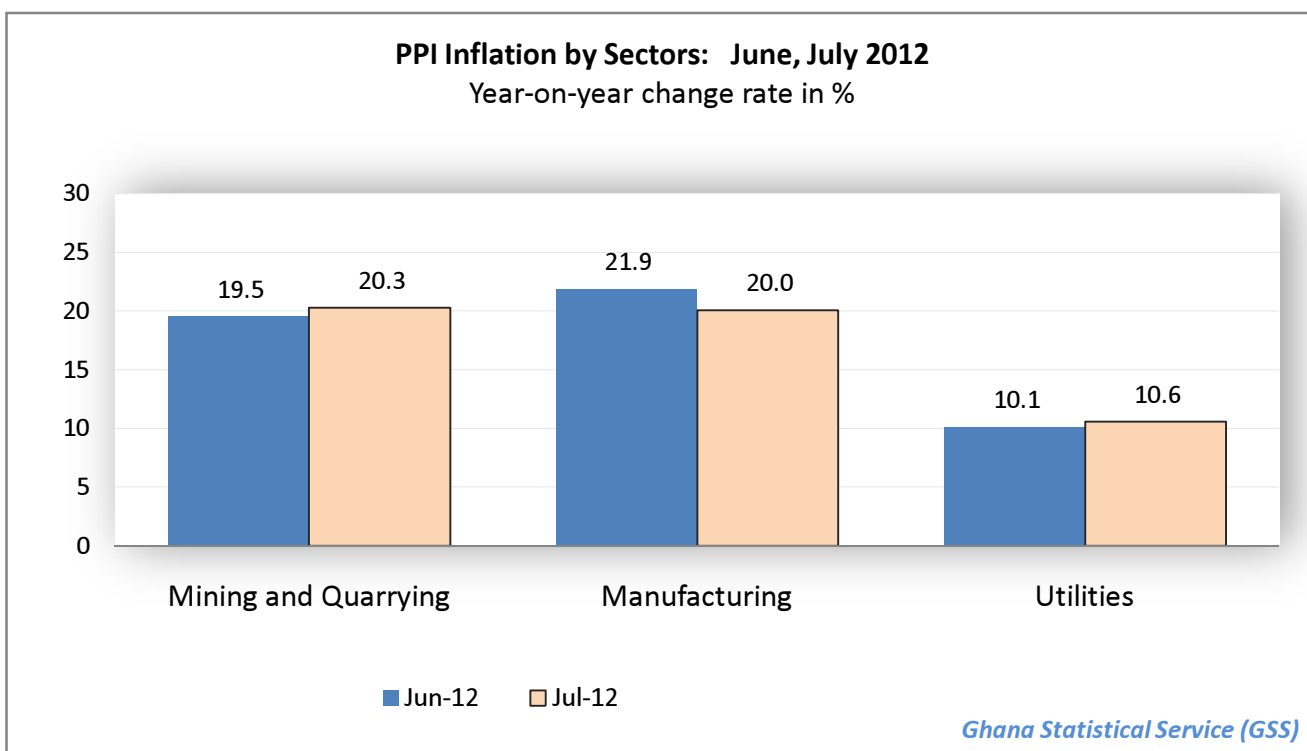

### Producer Price Inflation was 18.0% in July 2012

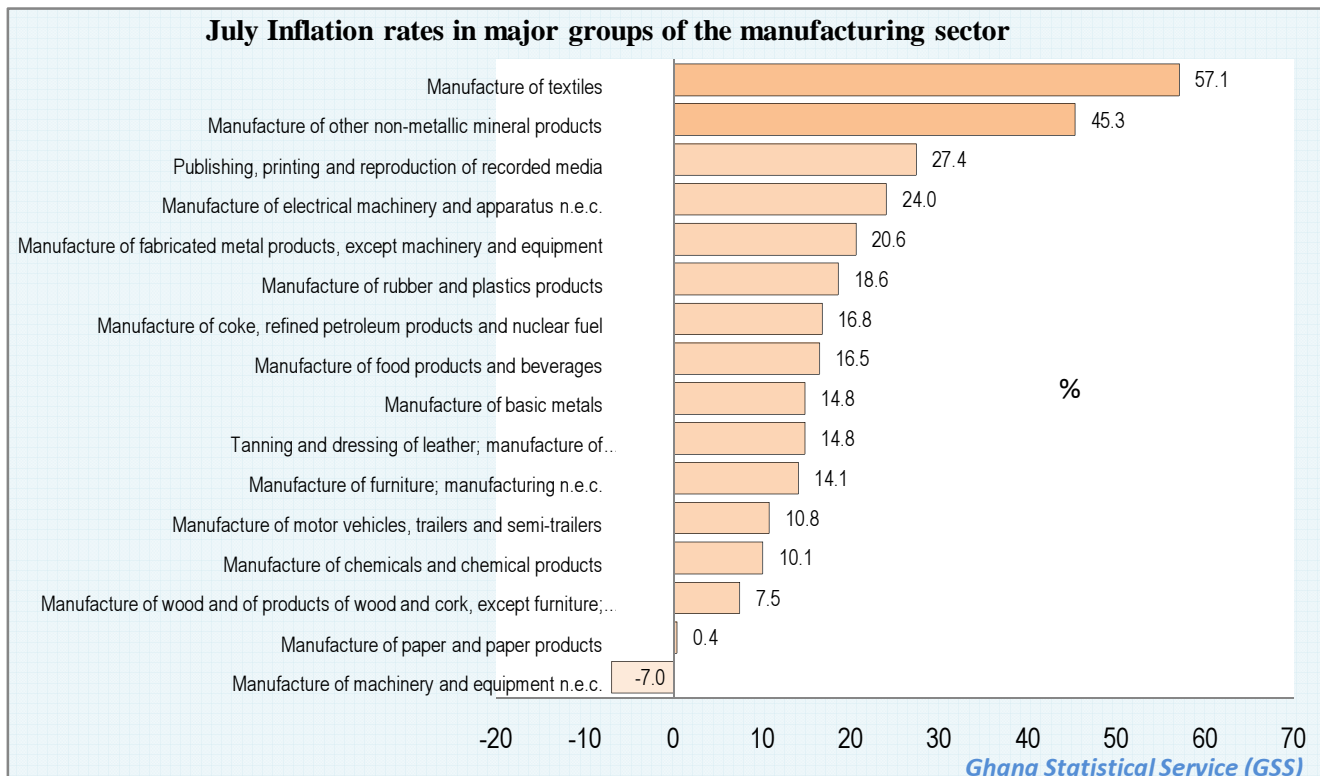

The Producer Price Index (PPI) measures the average change over time in the prices received by domestic producers for the production of their goods and services. The PPI for Ghana reports the producer price indices with reference to September 2006, the base period.

This bulletin shows the producer price changes since September 2006, as well as the annual (year-on-year) and monthly inflation rates, for all industry and three major sub-sectors of industry (Mining and Quarrying, Manufacturing, and Utilities) for the last twelve months. The figures for the month of July 2012 are provisional, and are subject to revision when additional data are available. All other indicators are final.

The Producer Price Inflation rate was 18.0 percent in July 2012 (year-on-year), representing a decrease in producer inflation of 1.1 percentage points relative to the rate recorded in June 2012 (19.1%). The month-on-month change in producer prices recorded 0.7 percent, following a rate of 2.5 percent in June 2012 (Table 1).

In July 2012, the producer price inflation in the mining and quarrying sector increased by approximately 0.8 percentage points over the June 2012 rate of 19.5 percent, to record 20.3 percent. Manufacturing, which constitutes more than two-thirds of total industry, decreased to 20.0 percent, from a rate of 21.9 percent in June 2012. The Utilities sector increased by 0.5 percentage points from the June 2012 rate of 10.1 percent to 10.6 percent in July, 2012 (Table 2).

During the 12-month period (July 2011 to July 2012), the all industry recorded the highest inflation in September 2011 (19.6%) and the lowest in December 2011 (13.6%). From January 2012 to May 2012, the producer inflation fluctuated between 15.0 percent and 16.6 percent. However in June 2012, the rate increased to 19.1 percent but declined in July 2012 to 18.0 percent.

**Manufacturing Sector:** During the month of July 2012, five out of the sixteen major groups in the manufacturing sector recorded inflation rates higher than the sector average of 20.0 percent. Manufacture of textile recorded the highest inflation rate (57.1%) whilst Manufacture of machinery and equipments n.e.c recorded negative inflation (-7%).

Over the last 12 months, the producer inflation in the petroleum industry subgroup has been exhibiting a downward trend from 27.4 percent in July 2011 to 16.8 percent in July 2012.

### Selected records:

**All items PPI:** Annual rate 18.0 percent; down from 19.1 percent last month.

**Petroleum Price Index:** Annual rate 16.8 percent; up from 16.1 percent last month.

**Manufacture of textiles:** Annual rate 57.1 percent; down from 63.2 percent last month;

**Manufacture of other non-metallic min. products:** Annual rate 45.3 percent; up from 43.7 last month; highest rate since 2007.

**Manufacture of paper and paper products:** Annual rate 0.4 percent; down from 3.5 percent last month; lowest rate since January 2010.

### Dissemination

The bulletin on the July 2012 PPI and more detailed data in time series format have been posted on the website [www.statsghana.gov.gh](http://www.statsghana.gov.gh).

The next release date is 26<sup>th</sup> September 2012.
