Producer Price Inflation increased to 16.14 in February 2012

The Producer Price Index

The Producer Price Index (PPI) measures the average change over time in the prices received by domestic producers for the production of their goods and services. The PPI for Ghana reports the price indices with reference to September 2006, the base period. This release shows the producer price changes since September 2006, as well as the annual (year-on-year) and monthly inflation rates, for all industry and three major sub-sectors of industry (Mining and Quarrying, Manufacturing, and Utilities) for the last twelve months. The figures for the month of February 2012 are provisional, and are subject to revision when additional data are available. All other indicators are final.

February 2012 Producer Inflation

The Producer Price Index increased by 16.14 percent between February 2011 and February 2012 (year-on-year), representing an increase in producer inflation of 1.13 percentage points relative to the rate recorded in January 2012 (15.01%). The month-on-month change in producer prices was 2.06 percent, following a rate of 5.18 percent in January 2012 (Table 1).
